

CORAL iSEM™ - Anti Money Laundering End-To-End Solution

To counteract this financial pandemic, TESS International is proud to introduce CORAL iSEM™, a state-of-the-art Anti-Money Laundering and Counter-Terrorism Financing (AML/CTF) solution which allows financial institutions to supersede AML/CTF regulations.

Designed with high customisation options in mind, CORAL iSEM™ can easily detect and filter out fraudulent transactions with exceptional efficiency and pinpoint accuracy, providing financial institutions the cutting edge tools for AML/CTF monitoring.

WHAT IS MONEY LAUNDERING?

A term that is often synonymous with white collar criminal activities, money laundering is essentially defined as the hiding of money or assets from the state to avoid taxation or outright confiscation.

While the negative effects of money laundering are difficult to quantify, it is very apparent that such activity causes massive loss to financial institutions, reduces a nation's productivity and encourages corruption. In fact, in today's world, money laundering is used as the primary source to finance terror groups such as ISIS and Boko Haram to name a few as well as local criminal organisations.
